NEWS FROM HEINLEIN PLASTIK-TECHNIK GMBH

We of Heinlein Plastik-Technik GmbH wish you a lot of fun reading our new newsletter format. Here you learn all about our latest innovations, investments and technological developments.

INVESTMENTS IN THE FUTURE:

Heinlein Plastik-Technik opened new extension building

After two years construction period two additional buildings are now available for Heinlein Plastik-Technik. The worldwide operating company of primary packaging invested in total 10 million € in more than **5 000 sqm of new buildings**. Thanks to the new spaces at the location in Ansbach our company opened completely new production capacities. The new systems and machines installed in the most modern production facilities have started their operations in September 2019. With this investment we further expand our range of service in strategically important areas of primary packaging to remain the right partner for you also in the future.

AT ITS BEST:

New machines for shorter delivery times

To meet the increasing demand for our worldwide used products with even shorter delivery periods, Heinlein Plastik-Technik invested 4 million € in new, high-performance injection moulding and assembly machines.

INNOVATIVE WAYS:

The way we develop your individual requests even faster

Our engineers are specialised to achieve the best performance out of our component parts. But even the best is only good if it is implemented fast and ecologically. That's the reason why we have implemented new opportunities for you to produce customized developments **faster and more cost-efficient**. How does it work? Please talk to us. For contact details please see page 2. We will gladly support you.

PLASTIK-TECHNIK

PRIORITY SUSTAINABLE:

Our commitment for more energy efficiency

Through investments in the improvement of energy efficiency we have continuously reduced our energy consumption in relation to material in the last years. With this, and with **green energy from our company's own solar power plant**, we have been able to partly antagonize the increasing energy costs.

Selecting our new injection moulding machines, we rely on hybrid drive systems with low electricity consumption.

Our sustainability programme covers production processes with efficient use of resources and on-going modernisation of our technical equipment.

MEETING POINT FOR INNOVATIONS:

The exhibition dates of Heinlein Plastik-Technik

We continuously expand the number of European and worldwide customers thanks to our convincing products of high quality. The demand for reliable primary packing and dosing systems has been continuously rising which is why Heinlein Plastik-Technik increasingly represents itself on international trade fairs.

In 2019 you could meet us on the following exhibitions:

CPHI/INNOPACK

Frankfurt, Germany
05.-07.11.2019, Stand 11.1 D43

PHARMTECH & INGREDIENTS

Moscow, Russia
19.-22.11.2019, German Pavillion
